TIPS & TRICKS

1. **IMPORTANT!** Apply pressure, as vertically as possible, in the center of the lever to avoid rocking punch head away from magnetic base. Heel of hand should be on the center of the punch lever. Make sure the edges of the upper punch do not lift up during your punch.
2. It may help to stand to apply additional pressure while punching.
3. Do not use heavyweight cardstock or fibrous papers.
4. If the paper gets caught in the punch, tap the punch lightly on your work surface. This will help release any paper scraps that may be caught.
